PROFESSIONAL SUMMARY

Fullstack Software Engineer with 4 years of experience developing web applications, backend services, and system integrations across e-commerce and fintech. Experienced with React, Next.js, TypeScript, and Node.js, including API development, payment processing, production troubleshooting, and performance optimization. I combine end-to-end product development with AI-assisted engineering workflows, focusing on maintainability, reliability, and delivering solutions aligned with business requirements.

PROFESSIONAL EXPERIENCE

Yuno | February 2026 – October 2026

Frontend Software Engineer

- Owned the development and maintenance of Yuno's Node.js-based VTEX Payment Connector, implementing new functionalities, API endpoints, and server-side business logic for payment processing.
- Extended payment capabilities to support multi-seller orders, recurring payments, and additional charges, working with API integrations and data persistence to support transaction processing.
- Improved the connector's performance, reliability, and maintainability through API interaction optimization, code modularization, production incident investigation, and bug resolution.
- Managed connector deployments and production monitoring, investigating logs, identifying integration failures, and validating changes across environments.
- Developed checkout experiences and payment integrations, including native wallet flows for Apple Pay, Google Pay, and Samsung Pay. Also contributed to the development and official publication of Yuno's WooCommerce payment plugin.
- Created Yunex, an internal AI assistant integrating technical documentation, source code, and Datadog logs to support incident investigations, knowledge sharing, and automated reporting.
- Used Claude Code daily for research, planning, implementation, and documentation, developing reusable skills and agent workflows while validating technical decisions and generated solutions.

ITGlobers | October 2022 – February 2026

Mid-level Frontend Developer | April 2025 – February 2026

- Developed e-commerce applications and integrations for clients across Latin America, Europe, and Asia using React, TypeScript, VTEX IO, and GraphQL.
- Built complete storefront experiences and custom applications aligned with business requirements, focusing on scalability, maintainability, and user experience.
- Improved application performance and visual stability through resource-loading optimization and frontend improvements.
- Collaborated with multidisciplinary teams on requirements analysis, technical planning, and development estimation.

Frontend Developer | October 2022 – April 2025

- Developed and maintained React-based e-commerce applications on VTEX, implementing features and adapting interfaces to client requirements.
- Collaborated with design and engineering teams to deliver responsive, consistent, and maintainable shopping experiences.

TECHNICAL SKILLS

Backend & Integrations: Node.js, REST APIs, GraphQL, payment connectors, SDK integrations.

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Sass.

Platforms: VTEX IO, FastStore, WooCommerce.

Testing & Quality: Vitest, Playwright, Jest, code review, debugging, production monitoring.

AI & Development Tools: Claude Code, AI agent workflows, reusable skills, Codex, Git, GitHub, Datadog.

EDUCATION

Universidad Nacional de Colombia — Software Development Diploma | 2022

Platzi — Self-directed Software Development Learning | 2022–Present

Universidad Externado de Colombia — Tourism and Hospitality Management | 2014–2020

LANGUAGES

Spanish: Native | English: C1 (IELTS)
